Subject: RE: equipment lists

The only thing that we could use is a biohazard-designed rotor for one of our centrifuges, for serum separation - that will cost \$1500 - \$2300; the Fisher Rep. is working on a quote for me – I should have it tomorrow.

There's really no room for anything else; and the push this year is to utilize the ICPMS and LCMSMS more – transfer methods; rather than get new equipment... (It's nice when no money and no needs meet... Lucky timing! I hope Amherst can get something – maybe there's something on the Surplus list from DEP...)

Subject: equipment lists
Importance: High

Hi,
I will be updating the SLI equipment list at a meeting next Thursday afternoon. I don't expect that there will be much (any?) available funding to purchase equipment but I always like to have a prioritized list in the event some funding becomes available. Please do your best to send a prioritized list by Wednesday @noon, so that I can compile the information and think about it before the meeting. Please use the following format:

priority	equipment	approximate price	quantity	extended cost	justification
----------	-----------	-------------------	----------	---------------	---------------

Julie
